Thin Solid Films, *175* (1989) v–ix

Contents

THIN FILM TECHNOLOGY IN MICROELECTRONICS

Microstructuring in semiconductor technology* 1
H. Mader (Munich, F.R.G.)

Advanced metallization of very-large-scale integration devices 17
H. Joswig, A. Kohlhase and P. Kücher (Munich, F.R.G.)

Physical and electrical properties of yttria-stabilized zirconia epitaxial thin films deposited by ion beam sputtering on silicon 23
C. Pellet, C. Schwebel and P. Hesto (Orsay, France)

Reduced aluminium electromigration in future integrated circuits—a problem of test procedure and threshold mechanisms* 29
H.-U. Schreiber (Bochum, F.R.G.)

Characteristics of hydrogenated amorphous silicon thin film transistors fabricated by d.c. magnetron sputtering. 37
A. Kolodziej and S. Nowak (Cracow, Poland)

Structural and technological properties of heavily *in situ* phosphorus-doped low pressure chemically vapour deposited silicon films 43
D. Bielle-Daspet, L. Mercadere, M. Boukezzata, B. Pieraggi and B. de Mauduit (Toulouse, France)

Oxynytride layers obtained by anodic oxidation of plasma-enhanced chemically vapour deposited Si_3N_4 films 49
I. Montero, O. Sánchez, J. M. Albella (Madrid, Spain) and J. Pivin (Orsay, France)

Selective low pressure chemical vapour deposition of tungsten: deposition kinetics, selectivity and film properties 55
H. Körner (Munich, F.R.G.)

Stress relaxation in tantalum silicide films by particle bombardment 61
C. Hardtke, H. Ullmaier, W. Schilling and M. Gebauer (Jülich, F.R.G.)

* Invited paper.

In situ planarization of intermetal dielectrics: process steps, degree of planarization and film properties 67
O. Spindler and B. Neureither (Munich, F.R.G.)

POLYMER FILMS

Supermolecular engineering by the Langmuir–Blodgett method* 73
A. Barraud (Gif-sur-Yvette, France)

Atomic resolution with a new atomic force tip 81
M. Pitsch, O. Metz, H.-H. Kohler, K. Heckmann and J. Strnad (Regensburg, F.R.G.)

Epitaxial growth and characterization of organic thin films on silicon. 85
U. Zimmermann, G. Schnitzler, N. Karl, E. Umbach (Stuttgart, F.R.G.) and R. Dudde (Berlin, F.R.G.)

Epitaxial growth of thin films of perylenetetracarboxylic dianhydride and coronene on NaCl(001) 89
M. Möbus, M. Schreck and N. Karl (Stuttgart, F.R.G.)

Interaction of metals with cadmium arachidate Langmuir–Blodgett films studied by X-ray photoelectron spectroscopy. 95
M. Schreck, D. Schmeisser, W. Göpel (Tübingen, F.R.G.), H. Schier, H. U. Habermeier, S. Roth and L. Dulog (Stuttgart, F.R.G.)

Langmuir–Blodgett monolayers from preformed polymerized surfactants containing styrene 103
Y. Shen, C. Boragno, R. Rolandi and U. Valbusa (Genoa, Italy)

LOW TEMPERATURE PROCESSES FOR THIN FILM PRODUCTION

Laser-assisted processes in the microelectronic industry 109
J. P. Budin, J. Boulmer and D. Débarre (Orsay, France)

Ion and plasma beam assisted thin film deposition 119
H. Oechsner (Kaiserslautern, F.R.G.)

Controversies in the suggested mechanisms of plasma-induced deposition of silicon from silane 129
S. Vepřek (Garching, F.R.G.)

Studies of formation of thin metal films on III–V compound semiconductors 141
Y. Shapira (Ramat Aviv, Israel)

Low temperature processes for thin film production: summary of the panel discussion. 149
K. Röll (Kassel, F.R.G.)

---

* Invited paper.

OPTICAL PROPERTIES AND OPTOELECTRONICS

Layered synthetic X-ray mirrors: fabrication, tests and applications* 151
P. Dhez (Orsay, France)

Interface analysis of sputtered W–C, Rh–C and Ni–C multilayers for soft X-ray applications 161
P. Boher, P. Houdy and C. Schiller (Limeil-Brévannes, France)

Optical coatings prepared from colloidal media 173
H. G. Floch, J. J. Priotton (Villeneuve St. Georges, France) and I. M. Thomas (Livermore, CA, U.S.A.)

Linear and nonlinear optical properties of thin evaporated and epitaxial II–VI compound films 179
U. Becker, M. Müller, A. Witt, M. Grün, Th. Pier, A. Schmidt, C. Klingshirn (Kaiserslautern, F.R.G.), K. Hingerl, H. Sitter, H. Heinrich (Linz, Austria), G. Wingen, Y. Iyechika and D. Jäger (Münster, F.R.G.)

Characterization of Ta_2O_5 layers by electron spectroscopy for chemical analysis, Rutherford backscattering spectrometry, nuclear reaction analysis and optical methods 185
K. Gürtler, K. Bange (Mainz, F.R.G.), W. Wagner, F. Rauch (Frankfurt, F.R.G.) and H. Hantsche (Berlin, F.R.G.)

Integrated optics in $LiNbO_3$* 191
W. Sohler (Paderborn, F.R.G.)

Growth of monocrystalline thin films of potassium–tantalate–niobate (KTN) by liquid-phase epitaxy 201
J. Hulliger, R. Gutmann and P. Wägli (Zurich, Switzerland)

Properties of ion-plated Nb_2O_5 films 207
J. Edlinger, J. Ramm and H. K. Pulker (Balzers, Liechtenstein)

Metal–organic vapour phase epitaxy: a thin film technology for large-scale production of high power GaAs/GaAlAs laser diodes 213
J. Luft and E. Wudy (Regensburg, F.R.G.)

Preparation and optical and electrical properties of co-evaporated $Pb_{1-x}Yb_xTe$ films 221
S. K. Das and R. Suryanarayanan (Meudon, France)

Magnetron-sputtered WO_3 films for electrochromic devices 227
K. Marszalek (Cracow, Poland)

Depth profiling of magnesium- and titanium-doped $LiNbO_3$ waveguides . . . 235
T. Bremer, P. Hertel, S. Oelschig, R. Sommerfeldt and W. Heiland (Osnabrück, F.R.G.)

* Invited paper.

Optical dispersion in electron-beam-evaporated indium tin oxide thin films . 241
R. Oesterlein and H.-J. Krokoszinski (Heidelberg, F.R.G.)

Photoangular effect in CdS(Cu,Cl) thin films 249
Z. Porada and E. Schabowska-Osiowska (Kraków, Poland)

Structural properties of ZnO films prepared by r.f. sputtering for optical applications 255
A. Valentini, F. M. Quaranta (Bari, Italy), M. Rossi (Rome, Italy) and L. Vasanelli (Lecce, Italy)

MAGNETIC PROPERTIES

Reversible optical recording on rare-earth–transition-metal disks 261
J. H. Crasemann and P. Hansen (Hamburg, F.R.G.)

Domain nucleation and wall movement in TbFeCo 265
S. Winkler, W. Reim and K. Schuster (Erlangen, F.R.G.)

High-resolution Kerr observation of magnetic domains* 273
H. Rohrmann and H. Hoffmann (Regensburg, F.R.G.)

Garnet thin film deposited by a new chemical vapour deposition 281
J. L. Deschanvres, M. Langlet and J. C. Joubert (St. Martin d'Hères, France)

Application of magnetic thin films for high-density data storage 287
B. Cord, W. Maass, J. Schroeder, K.-H. Schuller and U. Patz (Alzenau, F.R.G.)

Preparation and characterization of magnetic superlattices 295
L. Smardz, J. Baszyński (Poznan, Poland) and B. Rauschenbach (Dresden, G.D.R.)

Digital image processing for investigation of domain structure in garnet films 299
E. Kubajewska, A. Maziewski and A. Stankiewicz (Lipowa, Poland)

Temperature dependence of the critical radius of domains in rare earth–transition metal alloys for magnetic media 305
M. Labrune (Meudon, France), F. Rio and P. Bernstein (Les Clayes sous Bois, France)

Evidence for perpendicular magnetic anisotropy in Fe(110) epitaxial films in the monolayer range on gold 311
G. Lugert and G. Bayreuther (Regensburg, F.R.G.)

Spin waves and magnetoresistance in exchange coupled layered magnetic structures 317
F. Saurenbach, J. Barnaś, G. Binasch, M. Vohl, P. Grünberg and W. Zinn (Jülich, F.R.G.)

---

* Invited paper.

Resistivity, Hall effect and magnetoresistivity of amorphous iron and cobalt alloy films and their applications 325
T. Stobiecki (Kraków, Poland) and H. Hoffmann (Regensburg, F.R.G.)

Magnetic properties of coupled α/γ-phase Fe–Ni films 329
M. Konno (Tokyo, Japan) and H. Konno (Yokohama, Japan)

Multilayer structure of metallic glass films in a variable saw delay line 335
A. Milewski, J. Samula (Warsaw, Poland), L. J. Maksymowicz, J. Wenda, H. Jankowski and A. Kulak (Cracow, Poland)

Magnetic after effects in ultrathin cobalt films with perpendicular anisotropy. 341
G. Bayreuther, G. Lugert, C. Turtur (Regensburg, F.R.G.), P. Bruno and D. Renard (Orsay, France)

LETTERS

A technique for determination of microhardness profiles in thin surface diffusion layers L153
K. Sridharan, A. M. Redsten, F. J. Worzala, R. A. Dodd and J. R. Conrad (Madison, WI, U.S.A.)
